DLRO100 Series

Megger Digital Low Resistance Ohmmeters

- CAT IV 600 VAC / 500 VDC for safe operation
- Lightweight 100 A battery powered unit for portability
- High noise immunity for stable readings
- Smooth DC Output for circuit breaker testing
- IP54 for protection against dust and moisture whilst testing
- Save, download and delete results (100X/H variants)
- Remote operation, Bluetooth® & asset/result tagging (100H variants)

DESCRIPTION

A significant addition to the comprehensive range of Megger Low Resistance Ohmmeters, DLRO100 enables low resistance measurement, across multiple applications, in areas without access to mains power. The integral Li-lon battery supplies a constant 100 A current for up to 200 Manual/Auto tests to enable enhanced productivity in remote locations. With a focus on user safety, advanced design features ensure the safe operation of the instrument in the most adverse conditions, including a CAT IV 600 VAC / 500 VDC safety rating in accordance with IEC61010. The rugged design, intuitive interface and IP54 (lid open) rating ensure reliability and ease of use in the most arduous of conditions.

Test Modes

The **Manual test** mode allows the user to initiate the test procedure once the probes are in contact with the object under test. Once the TEST button is depressed the TEST lamp will illuminate and the instrument will undertake a single test to verify the resistance of the test object.

In **Auto mode** the user selects the desired current, connects the current test leads and as soon as the potential leads are connected a test will start automatically. To repeat a test, simply break contact with the potential probes and remake contact.

In **Continuous mode** the user connects the test leads and presses the TEST button, initiating the test procedure. The instrument will continue to test, updating the display after each new test cycle, until the TEST button is pressed or the test procedure times out.

Transport case

New – A high quality transport case which has enough storage space to store your instrument with a 5m lead set (10m and 15m lead sets will not fit)

The new transport case keeps your test leads together with the instrument, especially useful when instruments are stored in a

vehicle, ensuring everything needed is kept together and ready to test

See separate transport case data sheet (TC_DS_V01) for more details

A new tough adjustable clamp has been designed to ensure flexibility in many applications and provides a good connection with the test piece.

Test Leads:

Standard test leads, with separate Current & Potential, or Kelvin, combining both Current & Potential in one clamp, are available as optional accessories in 5 m, 10 m & 15 m lengths. All test leads are CAT IV 600 VAC / 500 VDC safety rated.

History of 'Ducter' testing

For over 100 years the 'Ducter test' has been used to describe a simple test for measuring very low contact resistances and "Ducter", which is still used as a trade mark, was the name originally given to the low resistance ohmmeter manufactured by Megger. The name Ducter was registered by Megger in June 1908 and 'Ducter' has since become the industry standard.

APPLICATION

The need for accurate low resistance measurement is well known and very diverse. Typical applications include:

Utilities & Service Contractors – commissioning new installations & regular maintenance testing of

- Switchgear and circuit breaker contact resistance
- Busbar and cable joints
- Wire and cable resistance
- Lightning conductor bonding

Original Equipment Manufacturer – detecting manufacturing defects

- Production test of circuit breakers contacts & joints
- Production test of high voltage switchgear
- Production test of welded joints & connections

Transport – manufacturing & maintenance

- Railway rolling stock ground connections & manufactured joints
- Railway lines & conductor rails commissioning & maintenance
- Aircraft frame bonds and static control circuits

FEATURES AND BENIFITS

			DLR	0100					
Features	E	EB	Х	ХВ	Н	НВ	Benefits		
CAT IV 600 VAC / 500 VDC up to 2000 m CAT IV 300 V up to 4000 m	•	•	•	•		•	On all test terminals for safe operation		
Lightweight 100 A battery powered unit		•					Easily portable – 7.9 Kg (17 lbs) with battery		
Mains only	•						Mains only units for manufacturing and production applications where AC is always available. Weight 7.0 Kg (15.5 lbs)		
High noise immunity	•	•	•	•	•	•	For stable readings in noisy environments		
Smooth DC Output							Circuit breaker testing		
IP54 Lid open IP65 Lid closed	•	•	•				For protection against ingress during operation (lid open) and storage (lid closed)		
							Always ready to test with a Li-ion fast charge battery - 2.5 hours charge time from fully discharged		
Li-ion battery						•	Works from an AC supply if the battery is fully discharged		
							Battery capacity - 200 single tests or up to 2x 10 minutes continuous 100 A output for extended use		
100A Manual, Auto and							Quick selection of test modes for different applications with 4 terminal measurement for flexibility		
Continuous test							,		
Custom test	•	•	•		•		Adjustable current 10 - 110 A, ramp rates configurable from 0.5s upto 30s and configurable test duration for flexibility		
Range and test mode rotary switches	•	•					Quick and easy selection of current ranges and test modes		
Ultra tough outer case construction	•	•	•	•	•	•	Designed for use in demanding environments with a flame retardant UL94 V0 inner case for safety		
Dual Ground™			*	*	*	*	Using the optional DC clamp enables circuit breaker testing with ground protection in place for safety		
Large, clear LCD							Ideal for all light conditions, with backlight		
Internal memory storage with USB download capability			•	•	•	•	For effective results management, up to 220 time and date stamped records		
Remote Control							Control the instrument remotely over USB via a PC or laptop for added safety		
Asset tagging							Running a PowerDB app on Windows tablet or smart phone to populate unique asset IDs for efficient asset management		
Bluetooth®							For effective wireless communication. For download and asset tagging		

^{*} with optional Clamp

All models. Two year warranty - second year conditional on free product registration.

Megger Digital Low Resistance Ohmmeters

A new terminal adapter has been designed to enable the use of users own test

A user replaceable high power lightweight Li-ion battery provides, from a single charge, 200 Manual/Auto 100 A tests or up to two 10 minutes continuous 100 A tests and takes 2.5 hours to charge when fully discharged.
